Full Stack Software Developer with proven expertise as a Lead Frontend Developer. Proficient in a range of technologies, I translate complex requirements into user-friendly solutions. I have strong soft skills and an eye for design, which make me a perfect fit for cross-functional roles that require communication, insight, and collaboration with clients, vendors, engineers, and internal stakeholders. I believe in mutually supportive, self-driven development in an agile environment, and as a leader I seek to create a blame-free culture that embraces problems and responds with curiosity.

EXPERIENCE

ScholarSift — Lead Frontend Developer

OCT 2021 - JUNE 2024

Spearheaded the development and implementation of user interfaces for ScholarSift's educational technology platform, enhancing usability and accessibility.

Collaborated with cross-functional teams to design and deliver responsive, high-performance web applications.

Led UI/UX design discussions and optimized front-end architecture, improving load-times and increasing user engagement.

PROJECTS

DataSlate — Project Lead

JANUARY 2021 - APRIL 2021

Directed the development of an E-Commerce platform and an internal team-management tool for a water delivery service.

Coordinated with stakeholders to gather requirements and define project scope, leading a team of developers to deliver the project on time.

Implemented a scalable architecture using React and Node.js, integrating with various third-party services to streamline operations.

Managed project timelines and ensured effective communication between team members and stakeholders.

ItsAnimatedText — E-Commerce & Content Management API

2021

Developed a comprehensive E-Commerce platform and content-management API as a solo freelancer.

Deployed using Heroku and integrated payment gateways for secure transactions.
